SOUTHERN CALIFORNIA IRIS GARDENS

ONE OF OUR IRIS FIELDS.

FOREWORD

WHETHER you are interested in landscaping a large estate or in having a small but attractive garden, we think that you will find lris one of the most valuable plants that can be used. It is a perennial, requires but little care, and furnishes flowers of wonderful beauty over a long period. Many of you are aware of this and already have fine collections.

We extend you a cordial invitation to visit our Exhibition Gardens. You will see there many varieties which we do not yet list. We are each year adding many of the newer introductions to our collection.

There are usually some varieties in bloom at all times of the year, but of course the real display is in the spring. The earliest of the tall growing bearded varieties start to bloom in February, but it is not until the latter part of March that the general onrush begins. Probably the height of the display of the bearded varieties is reached in April but frequent visits to the Gardens are well repaid during March, April and May.

We offer our services in helping work out any of your planting problems and will submit plans or, if you wish, can offer suggestions regarding any tentative ones which you have made. We make no charge for this service.

As our season of blooming is advanced six weeks or so ahead of that in the Eastern United States, it allows us to ripen the rhizomes in our rainless summer and send them East in time to become well established for the following spring. Many of our Eastern customers realize the advantage which this is to them.

To our neighbors here in Southern California we can furnish lris at any time of the year.

C. S. MILLIKEN R. E. WINCHESTER

 m_{min}

The prices quoted herein cancel all previous quotations made either by letter or in printed lists.

Prices include delivery anywhere in the United States on orders of not less than \$2.00 in value, provided such orders are placed in the summer or fall, when stock is in the best condition for shipping.

Six plants will be furnished at dozen rates only where quoted by the dozen. Price per hundred, or in larger quantities, quoted on application.

Terms: Cash with order.

© [_____ [©

Important Note: We exercise due care to keep all varieties TRUE TO NAME, and hold ourselves in readiness at any time to replace, on proper proof, any stock that may prove otherwise. All sales made subject to stock being unsold when order is received, or loss by any and all unavoidable causes.

We are often asked if our Irises are hardy in colder climates. We ship them all over the United States with perfect satisfaction, and have repeat orders from the same customers year after year. Our stock has a long growing season, and owing to our climate it becomes ripened so that it will ship well anywhere with no danger of rot.

We are always ready to give our advice, if asked, as to varieties best adapted to certain localities and conditions, and to quote net prices for collections.

(POGONIRIS)

The letter "S" represents the three upright petals or standards, and "F"	the
three lower petals or falls in the following listed varieties:	
· · · · · · · · · · · · · · · · · · ·	2.50
ACHERON (Sturt). A rich pansy violet with fine carriage. Free flow-	
ering. 3 ft	3.00
*ALBERT VICTOR (Barr). S. soft blue; F. beautiful soft lavender.	
40 in	.25
*ALCAZAR (Vilmorin). S. lavender-violet; F. velvety purple, with	
bronze veinings. Beard raw sienna color. Very large flower and	
tall grower. Desirable. Fine for massing	.50
ALICE OSGOOD (Sturt). A large flowered violet bicolor. 30 in	.50
AMACOR (Mohr). Tall pink bicolor with well-branched stems	1.25
*AMAS. Native of Asia Minor. Large flowers, blue and violet	.25
*AMBASSADEUR (Vilmorin). The largest and tallest of its class.	
Rich bronzy red. Should be in every good collection	.75
*ANN LESLIE (Sturt). S. white with faint rose tint; F. rich earmine.	
30 in	.50
*ANN PAGE (Hort). A beautiful pale lavender of large size and fine	
shape. Fragrant. Late. 3 ft	2.00
ANOSIA (Williamson). A rich brown and golden red combination which	
is distinct	1.00
ANTONIO (Hort). A very large flowered bright reddish-purple bicolor.	
Vigorous and fine. 3½ ft	2.50
APHRODITE (Dykes). A fine iris. In color a clear violet-pink. 4 ft	7.50
*ARCHEVEQUE (Vilmorin). S. purple-violet; F. very dark velvety pur-	
ple. Beard ocher, tipped brown. A very rich, handsome iris and	
free bloomer, blooming in mid-winter in Southern California	
	.35
*ARGONAUT (Bliss). Pale lavender-blue. Late. 30 in	1.00
ARGYNNIS (Williamson). Standards bright yellow, falls rich reddish	
brown. We recommend it. 3½ ft	1.00
ARLINGTON (Simpson). Red-purple; large flowers, well branched	
stalks. Excellent. Has a long blooming period	2.00
*ARMENIEN (Millet). Dark red-violet falls, drab standards, yellow	
styles, and conspicuous orange beard. Effective in mass. 3 ft	.50
	.50
*ARNOLS (Barr). S. rosy bronze; F. rich velvety purple. Handsome	
	.35
*ARSACE (Millet). A plant of tall vigorous growth, of evergreen fol-	
iage—a Ricardi hybrid. S. Lobelia violet and falls ageratum vio-	
let, producing a pinkish-lilac flower	.50
ARZANI (Sturt). A vigorous red-purple of fine habit. Tall. 3½ ft	10.00
ASIA (Yeld). Silvery-layender standards, which are golden at the base:	
falls a light violet. 4½ ft. A favorite of many	3.00
Plant bearded iris in a sunny well drained site	3.00
Fiant pearage in a sunity wen drained site	

*ATHENE (Sturt). A fine white with colored hafts. 3 ft	.50
AUREA MACULATA. Dwarf. A yellow with some purple tinting in the falls. Bright orange beard. Early	\$ 2.50
AUTUMN GLOW (Sturt). One of Miss Sturtevant's new varieties.	•
Soft amber color. About 3 ft	10.00
AUTUMN KING (Sass). A good blue-purple which blooms in the fall as well as in the spring. 1½ ft	2.00
*AVALON (Sturt). A pinkish lavender that is regarded by many as one of the most perfect bearded irises 3 to 4 ft	3.50
AZRAEL (Morrison). A beautiful violet flower, tall and with stately	3.30
carriage. 4½ ft	5.00
AZULADO (Mohr). Large pearl-blue flowers	3.00
BALBOA (Mohr). A tall, large flowered, bicolor in red-violet. Hardy	
in East. Late	2.50
BALLERINE (Vilmorin). S. light blue-violet; F. slightly deeper. Flowers of good substance and shape. 4½ ft. Excellent	1.00
BARRELANE (Sturt). A large bluish lavender self. 4 ft	.50
BEAU IDEAL (Sass). White with heavy violet border	1.00
BEL-COLOR (Denis). Creamy white, of branching habit. Medium	
size and height	.50
BELLORIO (Mohr). A pogono-regelia hybrid Soft mouse grey. Shape	
and carriage very distinct. 20 in. Excellent for California *BENBOW (Bliss). A deep violet-blue pallida. 3 ft	2.50 .50
*BIANCA (Millet). Standards light yellow, falls lined purple	1.00
BLUEBEARD. Dwarf, bluish-white and olive, Free blooming. Per doz.	2.50
BLUE STONE (Perry). Dwarf. Violet and purple	3.50
*BLUET (Sturt). Blue-layender. Good for massing. About 2 ft	.50
BRUNO (Bliss). One of the finest of the famous "Dominions." Very	
rich in color	10.00
*CAMELOT (Bliss). A very tall white, delicately frilled and tinted with violet	.50
CANDELABRE (Vilm.) A violet and white flower that is attractive. Of distinct garden merit	.35
*CANOPUS (Bliss). Of the famous Dominion strain. A bronzed purple, rich falls. 33 in	2.50
*CAPRICE (Vilm.). A low growing reddish purple flower. Ed. Michel is similar but taller. 20 in	.25
CARCANET (Sturt). A light yellow, very desirable for its garden effect,	
as it has good height and blooms freely. 3 ft	1.00
CARMELO (Mohr). A pogono-regelia iris. Shape of flower and unusual blue color make it distinct. Fine for California	1.50

CARNATION (Sturt). A pink bicolor desirable for massing. 3 ft	1.00
CARTHUSIAN (Marshall). A large flowered bluish-lavender of good quality. , 3 ft	.50
*CATERINA (Foster). S. clear light blue; F. soft lilac-blue, fragrant. 4 ft. This should be planted in quantity in the milder sections of the country where it does best. For a tall growing light bluish-	.50
lavender of medium price it is one of the very bestDozen \$2.50	.25
CECIL MINTURN (Farr). A near pink, very floriferous. 24 in	.75
CHALICE (Sturt). A beautiful soft yellow. Very desirable. Late. 33 in. True stock	4.00
CHASSEUR (Vilm.). One of the best yellows. The yellow is opaque instead of translucent as in Citronella. Flowers are large and	
borne on tall stems. Late. 3 ft	3.00
*CHERUBIM (Vilmorin). Soft lilac with lower petals of a darker	
shade	.25
CIRCE (Sturt.). Deep violet with ruffled standards. 33 in	.50
CITRONELLA (Bliss). A most wonderful flower with fairly luminous yellow standards. Most effective in brightening the garden.	
About 3 ft	5.00
CLUNY (Vilm.). Pale lilac-blue, falls slightly deeper than standards.	
Vigorous, with large flowers. 3½ ft	.50
*COL. CANDELOT (Millet). A good "squalens". Smoky standards, and reddish falls	.75
*CONQUISTADOR (Mohr). Very large and tall. Deep mauve to light violet. Good. To five feet in California	1.50
CORONADO (Mohr). S. Lavender; F. red purple, beard and style arms golden. A fine iris, especially for California, the Pacific Coast,	
and the South. 3 ft	2.50

*CORRIDA (Millet). S. and crests ontario violet; F. light dull bluish violet. Beard inconspicuous. Flowers of medium height. Charm-	
ing	
*CRIMSON KING. Rich claret purple. Practically an ever bloomer in	
Southern California. 2 ft	
CRUSADER (Foster). Very large, broad petaled flowers. S, a light	
shade, and F. a deep shade of violet-blue, beard orange-yellow.	
3½ ft	
CYANEA (G. & K.) Dwarf. A rich bluish-purplePer dozen	3
CYGNET (Sturt). A tall ivory white with flaring falls. This is an	
outstanding iris and we highly recommend it. 4 ft	5
*DALILA (Denis). Standards of pale olive buff, lightly flushed pink,	
with base of same and style branches touched with citron yellow,	
making a decided contrast with the velvety Dahlia carmine falls.	
Very late	
*DALMARIUS. S. satiny grey; F. lilac with silver sheen, deeper at	
claw, beard rich orange. 30 in	
*DAMOZEL (Morrison). Ruffled white standards, falls edged and traced	
with lavender. Excellent. 34 in	:
*DAWN (Yeld). Sulphur yellow deepening toward center; conspicuous	
orange beard. Late. 27 in	
*DEJAZET (Vilmorin). A good blend of yellow, rose and violet	
*DELICATISSIMA (Millet). Deep layender, deepening to light amparo	
purple in falls. Tall and vigorous, of Pallida type, Late. If you	
like "pink" iris you will wish this	
*DEMI-DEUIL (Denis). S. amber yellow, heavily veined and dotted	
deep livid purple; F, white, veined and dotted dark dull purple.	
A dark "plicata" of unusual color	
DEUCALION (Perry). A blend of apricot and rose which is much	
admired. 3 ft	
DIONYZA (Hort). A beautiful lavender brightened with yellow. Splen-	
did in California, 3 ft	;
*DR. BERNICE. S. coppery-bronze; F. velvety crimson. 2 ft	•
DONNA NOOK (Perry). A blue-purple. Attractive	
*DORA LONGDON (Bliss). Honey yellow, flushed magenta, deepening	
to magenta in falls. Orange beard. Very free flowering	
DOROTHEA K. WILLIAMSON, p. 21.	
*DRAKE (Bliss). Light violet of medium height	
*DREAM (Sturtevant). One of the best of the so-called pink irises	
of the pallida type	
DREAMLIGHT (Sturt.). Flushed with pink. 3 ft	
*DU GUESCLIN (Bliss). A rich, dark blue in effect, standards light	
violet and falls darker with lighter margin	
DULCINEA (Mohr), Standards light lavender, falls violet blue. Flow-	
ers large, stems well branched. Early	2
DUTCH IRIS n 92	-

EDITH CAV-ELL (Denis). One of the finest whites, for California at least. Large flowers with yellow throat.

*ED MICHEL (Verdier). Is nearer being a true purple than any other iris. Darker than Caprice. Large handsome flower and tall
grower
*ELDORADO (Vilmorin). S. violet, tinged with yellow; F. yellow, washed violet. Beard bright yellow. Free bloomer and very attractive
*ELIZABETH. S. white, heavily shaded lilac; F. white, shaded violet at margin
ELSA (Morrison). A beautiful clear blue-lavender flower of fine shape
and carriage. It attracts attention among hundreds of other
varieties. 4 ft
EMBER (Sturt.). A rich red-violet, well branched. Very desirable. 40 in. 3.50
ENDYMION (Sturt.). A blend of buff and lilac. Delicate and beautiful. 3 ft
ESPLENDIDO (Mohr). Large purple bicolor with well branched stems. Good. Mesopotamica one parent
EVADNE (Bliss). A deep rose self of decided merit. 3 ft
FAIRY (Kennicott). White, edged with pale blue. A splendid landscape variety. 3 ft
FLUTTER-BY (Sturt.). Clear yellow standards and lighter yellow falls. A garden gem. 30 in

For a bright border use a mixture of dwarf iris

FOLIOSA. p. 21.	
*FONTARABIE. S. violet-blue; F. rich violet purple. Very early.	
An excellent landscape variety. 18 in	.25
*FOSTER'S YELLOW (Foster). Of a somewhat darker hue than	
Flavescens	.25
*FRO (G. and K.), Yellow standards, oxblood red falls. Floriferous	
and bright	.50
FULVA. p. 21.	
GARDEN WHITE (Sturt.). A tall, well branched pure white with flar-	
	E 00
ing falls. Floriferous. 42 in	5.00
GARNET (Sturt.). A very rich violet borne on slender stems. The	4.00
flowers are small. 3 ft	4.00
GAVIOTA (Mohr). A cream with a yellow border. Charming	1.50
GENGHIS KHAN (Sturt.). S. pale rose; F. velvety purplish black.	
Possesses strength and dignity. 30 in	2.00
GERMAINE PERTHUIS (Millet). A very rich violet which is regarded	
by M. Millet as his best production. Undoubtedly a very superior	
variety. 3 ft	10.00
GLORIA. Dwarf. A free flowering creamy whitePer dozen	2.50
GLOW (Sturtevant). Lavender, flushed with yellow. 3 ft	.75
GLOWING EMBERS (Sturt.). Deep purple falls, brownish lavender	
standards and a golden center. Very greatly admired	5.00
*GOLD CREST (Dykes). A pretty violet blue self with prominent gold	
beard. Medium height	.75
*GOLDEN FLEECE (Caparne). A good light yellow, early and large	
flowers	.50
GOLD IMPERIAL (Sturt). Chrome yellow with orange beard. One of	
the best new yellows. 33 in	5.00
*GOLIATH (Cayeux) Wallace. After Prosper Laugier, but the falls	
are deep purple instead of crimson; standard paler bronze. Late	.50
GRAPTA (Williamson). A yellowish brown iris of the color of the but-	100
terfly for which it was named	.75
*GULES (Bliss). A very tall large bicolor, lilac and pansy violet	.50
HALO (Yeld). A light blue-violet of Lord of June type. Attractive.	.50
Over 3 ft	1.00
HARLEQUIN. Dwarf. A pale yellow, faintly washed here and there	1.00
with purple	2.50
HARRIET PRESBY (Presby). A tall rose-lilac of free blooming habit.	2.50
	0.50
31 ₂ ft	2.50
*HELEN KOEHLER (Koehler). A free flowering "pink" that elicited	4.65
favorable comment in our garden last year. 32 in	1.00
*HELGE (G. and K.) An early pale yellow. 2 ft	.25
*HERMOSA (Dean). Bright mathews purple, the yellow glow in crest	
and beard add to its attractiveness. Medium size and weight	.50
HEXAGONA, p. 21.	
HOOGIANA. p. 20.	

ALONE IN A CROWD

IDEAL (Cayeux). A clear blue which is a distinct addition to the	
limited number of varieties of this color. 2½ ft	3.50
tan. 3 ft	1.00
INNER GLOW (Sturt.). An ivory white which gets its name from its	
yellow throat. 33 in	2.50
garnet falls	.50
ISHTAR (Sturt.). A stately buff iris. Has all the qualities which lend	.50
refinement. 42 in	6.00
*ISOLINE (Vilmorin). S. pale-lilac, slightly flushed yellow; F. purplish	
old rose. Orange beard. Always admired	.35
*IVANHOE (Millet). Grayish chicory-blue to blush violet in falls. The	
touch of gold in base of segments and beard add to its attrac-	
tiveness	.50
*JACINTO (Berry). A beautiful flower in shades of violet. Stems	
4 ft., well branched. Like many good things, increasingly at-	
tractive with acquaintance	2.00
*JACQUESIANA. S. bright coppery crimson; R. rich maroon. Late.	
30 in	.35
JAPONICA. p. 20.	
JAPANESE IRIS. p. 23.	
*J. B. DUMAS (Denis). One of the choicest of the "Pink" Irises.	
Particularly adapted to Southern California. We enjoy the color	
of this in partial shade. 4 ft	2.00
JEAN CHEVREAU (Cayeux). S. yellow; F. white sprinkled with	
brown. Vigorous. A beautiful and unusual iris. 3 ft	2.50
*JEANNE D'ARC. White, reticulated violet	.35
JEANNETT DEAN (Sturt). Iridescent lavender. 3 ft	1.00
*J. J. DEAN (Dean). Standards light violet with falls of velvety royal	
purple. A striking bicolor, large flower and tall grower. This should be used in quantity in California where it blooms over a	
long period. The color carries well. 4 ft	.75
JUBILEE (J. Sass). S. yellow, F. cream dotted with purple. A large	.75
ruffled flower. 2 ft	3.00
JOYA (Morrison). A deep blue self. 2½ ft	2.00
*JUNIATA (Farr). Clear blue. 42 in	.25
KALIF (Sturt). White tinted with lavender. A strong grower, well	
branched. 3 ft. and over	6.00
KAREN (Morrison). A deep red-purple flower of excellent quality.	
More translucent than Opera, 2½ ft	1.50
*KASHMIRIANA. White, slightly washed lavender. Petals of a stout	
leathery texture; falls at right angles. TallDozen \$5.00	.50
*KASHMIR WHITE (Foster). A fine white for this location. Very	
large flowers on tall branched stems, blooms later than Albicans.	
Very distinct	.75
There is no better plant for dry supply slopes than iris	

KATRINKA (Sturt.) Brilliant	
yellow and velvety bright	
red. Beard orange, 20 in 1.00	
*KESTREL (Morrison). A rich	
purple bicolor. Excellent10.00	
KING KARL (J. Sass). Cream	
and buff flushed and sprin-	
kled with purple. 2 ft 3.00	
*KOCHII. Rich claret-purple. 30	
in, Free bloomer, Doz.\$1.50 .25	
*LADY FOSTER (Foster). Flow-	
ers unusually large, smooth	
and stout textured; splen-	
did, bold, erect habit; S.	
pale blue; F. light bluish-	
violet, veined old gold at	
the throat. 40 in	
*LADY LOU (Dean). Lavender	
violet self of Pallida type.	
Very early. Desirable in	
California for this reason	
LAMIA (Sturt. 1927). "A delicate	
blend in light pink with	
large flowers of the habit of	
growth of Mme, Cheri."	
Miss Sturtevant's descrip-	
tion. 4 ft 5.00	
*LENT A. WILLIAMSON (Wil-	
liamson). Standards hyssop	
violet. Falls velvety mul-	
berry purple. Large flower	
and plant of vigorous growth .50	
*LEONIDAS. S. soft lavender-	
grey; F, rosy mauve, 40 in,	
*LEVERRIER (Denis). A very	
large flowered Ricardi hy-	
brid. Tall branching stems,	-
mauve standards, and rich velvety Rood violet falls. Early. This	
	.50
*LOHENGRIN (G. and K.). S. mauve; F. Chinese violet, 33 in.	
	.25
LONA (Sass). Buff, sprinkled with purple, yellow throat. Unusual	دے.
	00
	.00
LORD LAMBOURNE (Perry). A fine iris with rich crimson falls and	•
rosy standards. 3½ ft 5	.00

*LORD OF JUNE (Yeld). A very large flowered iris of lavender and violet. A bicolor. Late	75
*LORELEY. S. lemon yellow; F. ultramarine-blue bordered cream. Very distinct	.25
*LUTESCENS MAJOR (Dean). The blossoms are identical with the seed parent, Lutescens Statellae, but they are borne on branching	
*MME. BLANCHE PION. S. soft bronzy yellow: F. standing at right	.50
angles, lavender blue, with a silver shaded margin	.50
mauve, upper half more heavily lined dark brown. Beard yellow tipped brown. Medium size and height* *MME, CHEREAU, White, elegantly frilled with wide border of clear	.50
blue. An old favorite. 30 in	.25
with a yellow undertone Large and tall. We recommend this MME. CHOBAUT (Denis). S. Baryta yellow, heavily veined deep pur-	1.00
plish vinaceous: F. pale olive buff, edged deep purplish vinaceous. Upper half of falls heavily lined. Beard yellow, tipped	
brown. Flower of medium size and height* *MME. CLAUDE MONET (Denis). A very large tall red-purple Ricardi	.50
hybrid. Very free flowering. Established plants bloom in fall in this climate. A splendid iris in California	2.00
*MME, DE SEVIGNE (Denis). A fine large Plicata with violet-purple markings	.50
stems. Standards clay color, flushed mauve; F. light Amparo purple, flushed clay color. This is undoubtedly one of the most beautiful of all irises, reminding one of a choice opal. 5 ft. Large	
rhizomes *MME. GUERVILLE. Pale violet, heavily dotted and veined so that at	3.00
a distance it has the effect of a pale blue selfDozen \$3.50 *MLLE, MARGUERITE GAUDICHAU (Millet). A free flowering bluish	.35
violet flower. 4½ ft	4.00 1.00
*MADY CARRIERE (Millet). A tall growing blend with grayish- laven- der standards, flushed amber-yellow; falls lobelia violet	.75
MAGNATE (Sturt). A deep red-purple; large flower. About 2 ft MAGNIFICA (Vilmorin). Large flowers of pink and violet shades.	.50
Generally admired	1.00
with bronze base; F. rich raisin purple. Well branched, 3½ ft. *MA MIE (Cayeux). White with blue pencilings. One of the best of	8.00
this type. MANDELAY (Sturt.). If you like the fragrance of water lilies you	.35
should have this Iris. It is pale violet in color. 3½ ft	.75

*MANDRALISCAE. Rich lavender-purple. Early and handsome. 3	
ft	.25
MARIAN MOHR (Mohr). A beautiful pale lavender. Fine in Cali-	
fornia. 4 ft	1.00
	1.00
MARGERY (Dean). Light wisteria violet; falls Bradley's violet; deep	
chrome beard. Large and tall growing. Hardy. A splendid	
variety, not widely known	4.00
MARIPOSA (Mohr). Pale porcelain, falls splashed with purple. Hardy	
and late. It is distinct	.50
MAROCAIN (Millet). Dwarf. One of the best dark purplesPer doz.	5.00
*MARY GARDEN (Farr). Pale yellow, falls finely dotted and veined	3.00
	0.5
maroon. Attractive and distinct. 28 in	.35
MARY GIBSON (Perry). Bronze and old rose, yellow at the base with	
conspicuous orange beard. One of the most beautiful of the many	
fine recent introductions	6.00
MARY WILLIAMSON (Williamson). S. white; F. purple bordered with	
white, A fine flower. 3 ft	1.50
*MAUVINE. S. mauve; F. a few shades darker of same color. Tall	
	25
and free flowering. Very handsome and distinctDozen \$3.50	.35
MEDRANO (Vilmorin). Deep maroon. Fine color. 2 ft	.75
MERLIN (Sturt.). A combination of violet, buff, and pink. 2½ ft	.50
*MESOPOTAMICA. S. soft blue; F. violet-purple. Very tall and early.	
Extensively used in breeding. We probably have the largest stock	
in the United States and can supply immense rhizomes. It is	
fine for mass planting in California	.75
*MESTOR (Perry). Deep purple and lavender. A large flower and a	.,,
vigorous plant, 3 ft	F 00
	5.00
MIDWEST (Sass). White, flecked with deep rose. Frilled. 30 in	1.00
MILKY WAY (Sturtevant). White, with a tint of lavender in the cen-	
ter. Very attractive	1.75
MIRANDA (Hort.). Tall violet-blue	.50
MOLIERE (Vilmorin). A deep violet. Large flowers. 30 in	.75
*M. BOYER (Denis). An attractive reddish flower	1.50

desirable.	3.50
YLO (Sturt). A dwarf lemon yellow with flaring falls. Flowers early.	4 60
4 to 10 in	1.00
Try Kharput with San Gabriel.	

ONE OF THE REGELIAS

ONCOCYCLUS

The varieties of this group are natives of Asia Minor and Persia where the summers are rainless. They start to grow with the fall rains and grow throughout the winter. Susiana grows well in California and is being successfully grown by many amateur gardeners in other parts of the country. It has to be given winter protection in the colder sections and has to be lifted in sections which have summer rains. Grow in full sun in warm location. Likes lime. *IRIS SUSIANA (The Mourning Iris). A wonderful flower of large size.

borne on 12 inch stems. It looks as if it were almost black, flecked with grey. In reality it has purple-black veining and spotting on a grey ground. The standards are somewhat lighter than the falls. Fall delivery only. \$10.00 a dozen....

1.00

REGELIA

This group of bearded iris is closely related to the Oncocyclus group but is much easier to grow. It includes some of the most beautiful of all irises and will be much more extensively grown when better known. The rhizomes must be kept dry during the summer, either by lifting or being placed where they get no irrigation. Growth does not start until late winter or early spring.

Keep Susiana and the Regelias dry in summer.

HOOGIANA. Native of Turkestan. The late Mr. Dykes, the leading iris authority, thinks that "Iris Hoogiana is perhaps the most aristocratic of all irises. There is a grace and distinction about the large flowers of uniform color, set off by the bright golden beard, which is not found even in the best pallidas." Color, pale grey-blue.

2.50

STOLONIFERA. Native of Russian Turkestan. Those who see it stand and admire. The finest things cannot be described. Flowers shot with "electro-blue." Falls and standards wavy. Fall delivery....

2.50

EVANSIA (The Crested Iris)

APOGON

(Beardless Iris) AMERICAN SPECIES

The varieties of this group are quite different in appearance from the bearded iris. The leaves are blade-like and in California are green all winter. The flowers, in contrast to the bearded iris. are flat. They can stand more water than the bearded varieties and do well in partial shade. They are particularly effective in borders and around pools.

IRIS STOLONIFERA.

Plant iris in bold clumps against the shrubbery

DOROTHEA K. WILLIAMSON (Williamson). A hybrid of fulva and foliosa. The flowers are large and are very brilliant velvety purple

borne on 30 in. stems. A fine cut flower. Hardy.....

FOLIOSA. This is much like Hexagona except reduced in height. Color. blue. Height 12 in. Native of Southern United

*FULVA. Flowers bright terra cotta on 18 in. stems. No other iris of this brick red color known. All six segments slightly drooping. Native in South but is easily grown in the northern United States. Flourishes

*HEXAGONA. A striking tall blue Iris which makes a beautiful combination with the yellow Spurias. Flowers in late April and early May in California, 3 to 4 ft.......50

SPURIAS

PURPUREA. A raisin purple hybrid.50

(We ship these in the fall only. We can move them locally at other times of year.)

The Iris in this group should be grown much more extensively than they are at the present time. The flowers last for a long time and the buds keep opening after cutting. In shape the flowers are almost identical with the Dutch and Spanish Iris and are as easy to handle without injury. The flower stalks, however, are from 4 to 6 feet high. The foliage is swordlike, as in the preceding group, but dies down during

A SPURIA.

.75

the winter. The plants are very effective in the border where they make large clumps.

cramps.	
*AUREA. A tall deep yellow. In California it is at the peak of its	
blooming period the last part of April or early in May. We recom-	
mend planting groups of six or twelve rhizomes. Somewhat later	
than Ochroleuca	.75
MONSPUR. A tall, light bluish purple	1.00
MONNIERI. Soft primrose yellow. Segments somewhat broader than in	
Aurea	1.00
*OCHROLEUCA. White with a yellow patch on the falls. Tall and	
effective\$2.50 a dozen	.25
*OCHROLEUCA SULPHUREA. Similar to the preceding but cream in-	
stead of white. Very beautiful	.50

UNGUICULARIS

A more euphonious name by which this group is often known is that of Stylosa. While scientifically we must talk of unguicularis, because this name was given first, in our gardens may we not grow stylosa? The garden use of the iris in this group is reserved for those who live in the milder climates.

The plants start blooming in the fall and bloom throughout the winter. They grow wild in Algeria, Greece, and Asia Minor. The foliage is grass-like and the flowers are borne on stem-like parts, really elongated perianth tubes. 8

to 16 inches long. The flower is one of great refinement and is delightful in the house.

Plant preferably from August to December. We do not advise planting later than February except in balled clumps.

A NATIVE CALIFORNIAN

Cut back Stylosa foliage in July or August

2.00

.75

XIPHIUM GROUP

The iris of this group have bulbs, not rhizomes. We ship from August to the middle of November. Not less than six of a variety except in our mixture.

- IRIS TINGITANA. Fall delivery. This is a different species from the Spanish and Dutch Iris, I. Xiphium, but belongs to the same group. It is the largest and finest of the entire group. The blades are a light blue with a central ridge of deep orange-yellow. The standards are a light blue-purple. For milder sections of the United States only. Fine in California. Large bulbs....... Dozen
- IRIS XIPHIUM. These are the irises so much in evidence in flower shops around Easter time and earlier. The Dutch are taller, larger flowered, and bloom two weeks earlier than the Spanish. In general appearance they are much alike.

DUTCH IRIS

(Large bulbs. Fall delivery)

SPANISH IRIS

(Fall delivery)

- SPECIAL VARIETIES. If you have special color requirements, write for prices,

SIBERICA

The Iris in this group have grass-like foliage, which dies down in winter. The plants are free flowering and the flower stalks are tall. They prefer rich soil and plenty of moisture.

KAEMPFERI

(Japanese Iris)

We have a splendid assortment of Japanese iris. They are choice seedlings and are as yet unnamed.

We can furnish a limited number of divisions this season.

Japanese iris need an abundance of water at blooming time but not throughout the year. The flowers are large and flat, often eight or ten inches across, and are in white, blue, purple, pinks and lavenders. We ship in the fall and the spring, the latter probably being the best time to plant.

Strong divisions 1.00

WATER IRIS

OUR COMPLIMENTARY OFFER

We have marked many varieties with an asterisk. We include with our compliments:

With a \$2.50 order of these varieties any 50c iris free.

With a \$5.00 order of these varieties any \$1.00 iris free.

With a \$10.00 order of these varieties any \$2.00 iris free.

IRIS SIBERICA.

Varieties Grouped by Color

M ANY of our customers wish to get a general idea of the garden values of different irises without spending time to read through the entire list carefully. To help them we have grouped many of our listed varieties into color groups. Sometimes the same variety may occur in more than one group if its colors will allow it to be used where those groups are wanted in a planting.

It would be possible to subdivide each group into sub-groups but no attempt has been made to do this as little would be gained for landscape purposes by so doing.

The great variety of color combinations in irises make any classification of this sort of nothing more than suggestive value. Color is only one of the elements which give iris character. The height, carriage, shape, substance, branching, abundance of bloom, and the character of the foliage must be considered.

A FEW CULTURAL NOTES

It is impossible to lay down any hard and fast rules regarding the culture of iris, as conditions are varied. They thrive in any soil, unless it is pure sand. When well established they should be given enough water, particularly just before and during blooming time, to keep them in good growing condition. Give good drainage and you will not have any trouble with root rot. Drainage can be secured in heavier soils by planting on ridges,

If the soil is poor and needs fertilizing, bone meal can be used or, in California, a light application of blood or tankage. Bearded iris like lime. Lime is particularly beneficial on heavy soils as it floculates these soils and improves the drainage. Barn yard fertilizer, if used at all, must be well decayed and thoroughly worked into the soil.

Transplanting may be done at any season, but the best time, if one cares to keep watered sufficiently to start the new growth, is when they go out of bloom, otherwise the fall is better. Do not overwater, however, so that they will become water-logged and decay. If too dry they are likely to shrivel even if they do not die.

Do not plant deep, barely cover the rhizomes.

Some varieties should be divided every two years—others every three or four. Give the rhizomes room for the side shoots to get a foothold.

The variegatas and a few others of the bearded varieties do better, that is make longer flowering stems, if given a soil with plenty of humus.

Give the Stylosa the same treatment as the Bearded varieties, and after the first year cut the foliage down close to the ground the latter part of July or August. The flowers will show to better advanage and abundant fresh leaf growth will appear.

Do not transplant Stylosa in spring or summer. New root and leaf growth starts at the beginning of the flowering season.

The beardless varieties prefer a rich soil with humus and plenty of water. The Spurias, however, give very satisfactory results when treated the same as the bearded varieties.

The Crested varieties do better in partial shade with a rich soil and liberal moisture,

Sibiricas must have moisture all of the year and will not thrive with the treatment usually given the Bearded ones.

The native varieties of this coast when established do not require moisture during the dry season. Transplant either in the fall or spring. The replanting of this stock after it has made two or three years' growth is rather hazardous

We should plant more Spurias,

and success depends largely upon the season. Artificial watering does not seem to have the same effect as the natural rains.

All irises bloom better in full sun unless it is a very few like the crested. Partial shade, however, suits them well.

The above applies more particularly to culture in Southern California, but much of it also applies to any location.

The American Iris Society sends interesting bulletins to all of its members. The annual dues are only \$3.00. You are eligible to membership. Send check to Mr. J. B. Wallace, Jr., 129 Church St., New Haven, Conn.
